Help your nurses and other clinicians perform skills and procedures with confidence.

Integrate Elsevier Clinical Skills into training and continuing education programs to provide your entire nursing staff with quick access to the skills and procedures they need to perform confidently.

Clinical Skills combines competency management features with over 1,500 evidence-based skills and procedures, including 95+ skills localised to Australian and New Zealand standards, to create a powerful resource for your nurses, therapists and other clinicians. It helps address the need for both care consistency and competency validation, while positioning you in alignment with the latest professional guidelines and key standards of care — all of which allows you to improve practice and patient outcomes.
Powerful reference for staff. Complete competency management for all.

- Evidence-based skills that can be customised to reflect the needs and practices of your organisation
- Ability to archive lessons and learning tasks with 40+ reports to analyse learner behavior
- Auto assignment of remediation based on answers
- Skills and procedures are continuously updated
- Online, 24/7 access
- Refresh knowledge
- Learn entirely new skills
- Master concepts through an interactive testing process with immediate feedback
- Increase overall competency
- Stay informed of policy changes and organisational developments

Core skills have been developed to align with Australian NSQHS Standards and are linked to Australian RN and EN, plus New Zealand RN competencies and standards.
